Instruments

NOTE

- The BOD Instruments section provides a list of all instruments available at the beginning of the day.
- The MTF Instruments section provides the list of MTF instruments in JSON format.
- The MIS Instruments section provides the list of MIS instruments in JSON format.
- The Suspended instruments section provides the list of Suspended instruments in JSON format.

RECOMMENDATIONS

- Use `instrument_key` for uniquely identifying instruments, as it remains unique for each instrument. Conversely, `exchange_token` may be reused by the exchange for a different instrument after its expiry.
- Use Instruments data in JSON format instead of CSV, as its structure has been designed for enhanced robustness and future scalability, making programmatic processing easier.

JSON files

These URLs provide access to the complete list of BOD contracts available for trading on Upstox in JSON format.

- Complete
- NSE
- BSE
- MCX

Suspended Instruments

This URL provides access to the list of suspended instruments that are not available for trading on Upstox.

- Suspended

MTF Instruments

This URL provides access to the list of instruments that are available for Margin Trading Facility (MTF) on Upstox.

- MTF

MIS Instruments

This URL provides access to the list of instruments that are available for Margin Intraday Square-off (MIS) on Upstox.

- NSE
- BSE

Sample JSON Object

NOTE

- The first four tabs (EQ, Futures, Options, and Index) are all included in the BOD json file.

EQ | Futures | Options | INDEX | Suspended | MTF | MIS

```
{
  "segment": "NSE_EQ",
  "name": "JOCIL LIMITED",
  "exchange": "NSE",
  "isin": "INE839G01010",
  "instrument_type": "EQ",
  "instrument_key": "NSE_EQ|INE839G01010",
  "lot_size": 1,
  "freeze_quantity": 100000.0,
  "exchange_token": "16927",
```

```
  "tick_size": 5.0,
  "trading_symbol": "JOCIL",
  "short_name": "JOCIL",
  "security_type": "NORMAL"
}
```

NOTE

- When you're searching for instrument keys within an instrument JSON file, you can employ the `segment` and `instrument_type` parameters to refine and narrow down the list of instrument keys. For instance, if you're looking for the instrument key for Reliance Equity, specify the `segment` as `NSE_EQ` and the `instrument_type` as `EQ`, excluding other segments and instrument types from your search criteria.

Field Description

Field Name	Type	Description
segment	string	Segment to which the instrument is associated. Possible values: `NSE_EQ`, `NSE_INDEX`, `NSE_FO`, `NCD_FO`, `BSE_EQ`, `BSE_INDEX`, `BSE_FO`, `BCD_FO`, `MCX_FO`, `NSE_COM`
name	string	The name of the equity.
exchange	string	Exchange to which the instrument is associated. Possible values: `NSE`, `BSE`, `MCX`
isin	string	The International Securities Identification Number.
instrument_type	string	The instrument types for NSE are present at NSE India and for BSE are present at BSE India.
instrument_key	string	The unique identifier used across Upstox APIs for instrument identification. For the regex pattern applicable to this field, see the Field Pattern Appendix.
lot_size	number	The size of one lot of the equity.
freeze_quantity	number	The maximum quantity that can be frozen.

Field Name	Type	Description
exchange_token	string	The exchange-specific token for the equity.
tick_size	number	The minimum price movement of the equity.
trading_symbol	string	Trading symbol of the instrument.
short_name	string	A shorter or abbreviated name of the equity.
security_type	string	Identifies the classification or status of a security within the market. Valid security types can be found in the Security Type Appendix

NOTE

- The files undergo daily refresh at around 6 AM, and they are only refreshed as needed during the day, which is a seldom occurrence.
- The BOD instrument for the next trading day will not include delisted stocks or expired contracts.

DEPRECATION NOTICE

- **The CSV format for instruments files is being deprecated.** Switch to the JSON format for improved performance. Details at CSV Instruments File Deprecation Notice.

CSV Files Deprecated

These URLs provide access to the complete list of BOD contracts available for trading on Upstox in CSV format.

- NSE
- BSE
- MCX

Sample CSV Record

instrument_key	exchange_token	tradingsymbol	name	last_p
NSE_FO|164693	164693	RELIANCE24JAN1840CE	RELIANCE INDUSTRIES LTD	424.8

Field Description

Name	Type	Description
instrument_key	string	The unique identifier used across Upstox APIs for instrument identification. For the regex pattern applicable to this field, see the Field Pattern Appendix.
exchange_token	number	The numerical identifier issued by the exchange representing the instrument.
tradingsymbol	string	Shows the trading symbol which could be a combination of symbol name, instrument, expiry date etc. The format of this value may vary between weekly and monthly contracts, leading to inconsistencies. These inconsistencies have been resolved in the JSON version.
name	string	Name of the company (for equity instruments).
last_price	number	Last traded price.
expiry	string	Expiry date (for derivatives). Data format is `yyyy-MM-dd`
strike	number	Indicates the predetermined price at which an option can be bought or sold when it's exercised.
tick_size	number	Measure of the minimum upward or downward movement in the price of an instrument.

Name	Type	Description
lot_size	number	Minimum size in which the stock futures or index futures can be traded.
instrument_type	string	Instrument type of a particular contract. Possible values: `FUTSTK`, `OPTSTK`, `OPTIDX` etc.
option_type	string	Option type of the option contracts (applicable only for options contract). Possible values: `CE`, `PE`
exchange	string	Exchange to which the order is associated. Possible values: `NSE_EQ`, `NSE_FO`, `NCD_FO`, `NSE_INDEX`, `BSE_EQ`, `BSE_FO`, `BCD_FO`, `BSE_INDEX`, `MCX_FO`, `NSE_COM` etc.
