Option Greek Fields

This API endpoint provides option Greek data for specified instruments. The response contains all fields required to construct an option chain, as well as the current day's total trading volume. This API supports a maximum of 50 instrument keys in a single request.

Request

```
curl --location 'https://api.upstox.com/v3/market-quote/option-greek?
instrument_key=NSE_FO%7C43885' \
--header 'Content-Type: application/json' \
--header 'Accept: application/json' \
--header 'Authorization: Bearer {your_access_token}'
```

For additional samples in various languages, please refer to the Sample code section on this page.

Query Parameters
